About ITandFactory

ITandFactory GmbH (a fully owned subsidiary of Neilsoft Pvt Ltd.) is the leading providers of complete Process industry solutions based on innovative technologies. As a part of the Neilsoft group, ITandFactory also provides engineering services to its customers and has been servicing them across a range of engineering segments, helping to improve their design and engineering efficiency, supporting their global footprint and improving their competitiveness in the market.

Leveraging technology, domain knowledge, robust work planning methodology along with consistent attention to the key deliverables of client satisfaction, timeliness, accuracy and a clear perspective of nurturing long-term relationships have ensured that we have satisfied clients across the globe.

Visio P&ID Process Designer (VPID)

Visio P&ID Process Designer is a Microsoft Visio® based solution developed by ITandFactory GmbH for Process engineers to transform their concept design and ideas quickly into PFDs & P&IDs. Visio P&ID Process Designer adds intelligence to the objects, uses object-oriented database technology, has built-in tools for BOM and Report generation, Document management, Revision management and improved drawings generation capabilities for enhanced productivity.

Visio P&ID Process Designer – Extended Service Offerings

VPID customers can rely on ITandFactory as not just a solution provider, but also as a committed partner. We help customers to realize their core strategic expectations, improve their competitiveness, minimize risks and failures, and help optimize the Project completion time, hence reducing the overall cost. We offer the following services to our VPID customers:

- New PFD and P&ID Creation using Visio P&ID Process Designer
- Digitization and Legacy Data Conversion (Conversion of old AutoCAD drawings, Hand sketches, old Visio P&IDs into intelligent VPID P&IDs)
- Creation of custom P&ID Symbols and Stencils in VPID
- Tagging and Designation Configurations for pipelines, equipments and fittings in P&IDs
- BOM, BOQ, Datasheets and Report Customization for P&IDs
- Creation of LFF (List from File) functionality for updating Object data in P&IDs
- Custom Catalog Creation for updating Manufacturer Object data in P&IDs
- Title Block and Template Customization per company standards
- Input Form Customization for easy updating the object tables & properties

Why choose ITandFactory as your service partner?

Expert Team
We have experienced design experts, advanced infrastructure and latest technologies to ensure that you get superior and error free deliverables always

Process Excellence
We follow the best practices as per ASME, DIN, EN, ANSI, ISO drafting standards to ensure project quality and efficiency

Data Security
We have strict security policies and measures to ensure that all the data shared with us is maintained safely during the project execution

Quick Delivery
With multiple delivery centres across the globe, we ensure that we deliver our services within committed timeframe

Competitive Prices
We offer flexible and best in market pricing options be it Fixed bid or a Time based billing as per requirement
